

SlideShare Downloader: Step-by-Step Guide

Save SlideShare presentations as PDF, PowerPoint or images, in three easy steps.

This free guide shows you how to use SlideShare Downloader at slideshare-downloader.dev. It is free, needs no login and installs nothing. You only need the link of a public presentation. Every picture in this guide is a real screenshot of the live tool.

You need: a public SlideShare presentation link • any browser • about one minute

1 Open the tool

Go to slideshare-downloader.dev. The downloader is the box at the top of the page, ready to use. There is no account to create and nothing to install.

Screenshot: the downloader on the homepage, ready for a link.

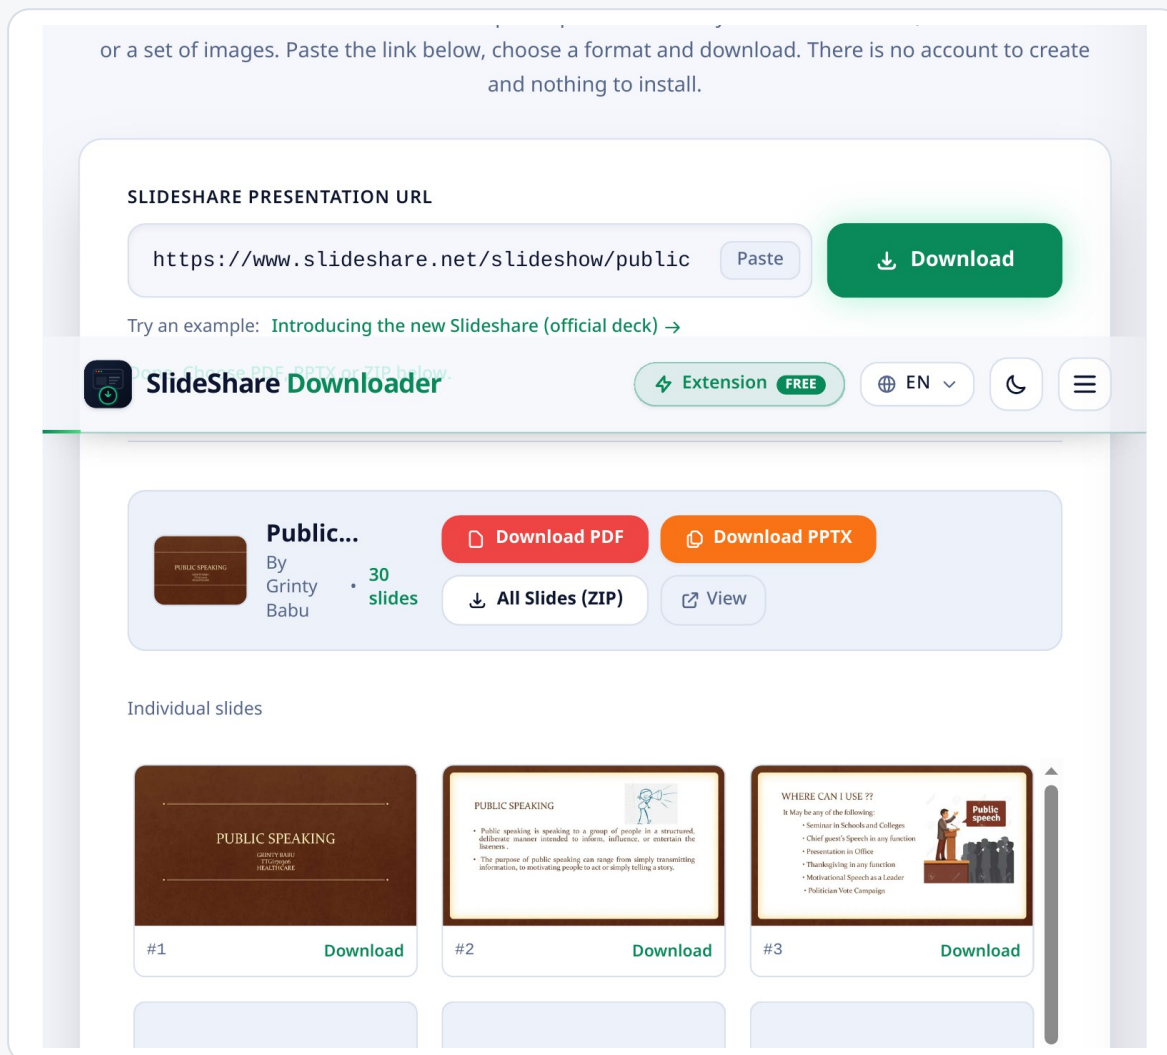

2 Paste the presentation link

Open the presentation on SlideShare and copy its address from the address bar. On a phone, use the share menu and choose Copy link. Paste the link into the box and press the green Download button.

Screenshot: a real SlideShare presentation link pasted into the box.

3 Choose PDF, PPTX or ZIP

The tool reads the deck and shows its title, author and slide count. Download PDF is best for reading and printing. Download PPTX gives you a PowerPoint file. All Slides (ZIP) saves every slide as an image, and each slide in the list below the buttons has its own Download button too.

Good to know

- Slides are images: SlideShare shows every slide as a picture, so the saved text is part of the image and cannot be edited directly. Run the PDF through an OCR tool if you need selectable text.
- Sharpness: the tool saves the largest slide images SlideShare offers, up to 2048 pixels wide, which prints cleanly on A4 and Letter paper.
- Restricted decks: if a deck cannot be fetched, the author may have limited access to it. Only save decks you are allowed to keep.
- Be fair: always credit the author, and never republish someone else's deck as your own.

Quick answers

Is it free?

Yes. Free, with no login and nothing to install.

PDF or PPTX, which should I choose?

PDF for reading and printing. PPTX when you want the deck inside PowerPoint.

Can I save just one slide?

Yes. Every slide in the result has its own Download button, and All Slides (ZIP) saves the whole set at once.

Try it now at slideshare-downloader.dev

Free. No login. Nothing to install.
